Professional Summary

Results-driven **Python Full Stack Developer** with hands-on experience in **Django, and MySQL** for building scalable, production-ready web applications. Proficient in designing RESTful APIs, responsive frontends, and optimized database schemas. Strong foundation in **Data Structures & Algorithms** and **OOP principles**. Actively seeking a **Full Stack Developer / Software Developer** role to contribute to impactful projects using Python, Django, and modern web technologies.

Technical Skills

Programming Languages: Python, JavaScript (ES6+), HTML5, CSS3, SQL
Frontend: Bootstrap, Responsive Web Design, Cross-Browser Compatibility, React.js (Basic to medium)
Backend: Django, Django REST Framework (DRF), RESTful API Development
Databases: MySQL, Django ORM, Database Design & Optimization
API & Testing: CRUD Operations, Postman, Thunder Client, API Integration
Tools & DevOps: Git, GitHub, VS Code, Agile/Scrum, MVT Architecture
Concepts: OOP, Full-Stack Development, MVT, AI Tools Integration
Data Structures & Algorithms: Arrays, Linked Lists, Stacks, Queues, Trees, Hashing, Sorting (Merge, Quick), Binary Search, Recursion, (Basic to Medium – Python)

Projects

- Django E-Commerce Platform** *Python, Django, MySQL, HTML5, CSS3, JavaScript*
github.com/saipediredla45/Sai-E-Commerce
- Built a full-featured e-commerce web application with product catalog, shopping cart, and secure user authentication using Django framework and MySQL backend.
 - Developed RESTful APIs for product management using Django REST Framework; implemented Django ORM for efficient and optimized database queries.
 - Designed responsive user interface with HTML5, CSS3, and JavaScript ensuring seamless cross-device experience.
 - Built an admin dashboard with inventory management and order tracking functionality to streamline business operations.
 - Integrated Django's built-in authentication framework for secure user registration, login, and session management.
- Blog Website with CRUD Operations** *Python, Django, MySQL, HTML5, CSS3, JavaScript*
github.com/saipediredla45/saiblogswebsite
- Developed a dynamic blogging platform with full CRUD functionality for creating, reading, updating, and deleting posts using Django and MySQL.
 - Implemented multi-author user registration and authentication system, enabling secure content management across multiple accounts.
 - Designed an intuitive, responsive user interface using HTML, CSS, and JavaScript with clean layout and category-based navigation.
 - Utilized Django templates and class-based views to render dynamic content, manage categories, and handle blog post workflows effectively.
 - Integrated MySQL database for storing blog posts, comments, and user data with optimized schema design and indexed queries.

Education

Bachelor of Technology – Data Science	<i>Expected May 2027</i>
Avanthi Institute of Engineering & Technology, Visakhapatnam, AP	<i>CGPA: 8.6/10.0</i>
Intermediate (XII)	<i>2023</i>
Vivekananda Junior College, Narsipatnam, AP	<i>Percentage: 69%</i>
Secondary School (X)	<i>2021</i>
ZPHS High School, Nathavaram, AP	<i>Percentage: 92%</i>

Certifications & Achievements

- Completed **Python Full Stack Developer** certification on **Python Life** platform, covering Python, Django, REST APIs, and full-stack web development
- Earned technical certifications in **Full-Stack Web Development** and **Database Management**
- Achieved **CGPA of 8.6/10.0** in B.Tech Data Science program
- Self-taught in **AI Tools Integration** and their practical applications in modern software development
- Solved **Data Structures & Algorithms** problems (Basic to Medium) on LeetCode/HackerRank using Python

Additional Information

- Languages:** English (Professional Proficiency), Telugu (Native)
- Interests:** Full-Stack Development, Data Science, Machine Learning, AI Tools Integration, Open Source
- Soft Skills:** Problem-Solving, Team Collaboration, Quick Learner, Adaptability, Time Management
